

Rename - ALFRED Workflow

This file-action-triggered workflow is based upon Tobias Mende's [Bulk Renaming](#) workflow.

I made a few changes to suit my needs.

The Run Script actions invoke Python scripts that do the heavy lifting.

There are several stages that provide flexibility to the process:

1. Enter the match pattern
2. Enter the replace pattern
3. Confirm the changes

The Replace Pattern menu (#2) is shown below illustrating the options for common replacements.

Enter or choose a pattern to replace the names with

Prepend date

{d} \$0

⌘2

Prepend timestamp

{ts} \$0

⌘3

Append date

\$0 {d}

⌘4

Append timestamp

\$0 {ts}

⌘5

Title case

c/\$0

⌘6

Lower case

l/\$0

⌘7

Upper case

u/\$0

⌘8

Replace dashes with spaces

r(-,)/\$0

⌘9
